**WaterShapes: Author Index, 1999-2008**

The numbers tell the story: The past ten years and 106 issues of *WaterShapes* have seen publication of nearly 400 articles written by more than 230 watershaping professionals. The success and value of the magazine extends from the willingness of these professionals to give of their time and energy to communicate what they know and what they've learned to other watershapers.

In testimony to the power of the forum, these contributions have come from the mainstream as well as the farthest-flung corners of the WaterShaping Industry – from pool builders and pond installers as well as from fountain designers, Japanese gardeners and a range of talented artists, engineers and suppliers.

*Note: In this special Index Issue, individual copies of the magazine are referred to using a simple shorthand that calls out the month (or months) of publication and the year, followed after a colon (:) by the number of the item's opening page.*
